Outcomes: The use of Information and Communication Technology (ICT) helped the participants to develop various skills such as word processing, MS office (word, excel, power-point), data management, internet navigation, social media management, online research, technical knowledge etc. All the participants/faculty members developed pro-efficiency in computing skills. Moreover, they have learnt to use various computer packages for their effective computation work.

Assessment: The participants were evaluated on the basis of MCQs and assignment after the completion of programme.

Subject: Report of Value Aided Programme conducted on "STAAD PRO."

Respected Sir,

With reference to above mentioned Value Aided Programme on "STAAD PRO." held on 19-24 November 2018 with 71 Students in civil Engineering Department. After completion of training all students get certificated.

Objective of the Programme: Aims to enhance the overall efficiency and effectiveness of structural engineering projects by providing a structured approach to utilizing the software's capabilities.

Outcomes of the Programme: STAAD PRO association with Apex CADD Centre, aimed to enhance the skills and knowledge of participants in using STAAD Pro for structural analysis and design. The program typically includes a series of workshops and hands-on training sessions that cover various aspects of the software,

- Understanding Structural Analysis
- Design Compliance
- Practical Applications
- Efficiency Improvements
- Networking Opportunities

Assessment Process: The Assessment process is conducted by the 20 MCQ based question after the completion of Value Aided Programme.

Respected Sir,

With reference to above mentioned Value Aided Programme on "GST & Supply Chain & Logistic Management" held on 09 September to 24 December 2021 on online mode with 31 Students in MBA Department. After completion of training all students get certificated.

Objective of the Programme: The objective of GST is in taxation and fostering an environment conducive to efficient supply chain management and logistics operations in to simplified way in tax structures, improving credit mechanisms, increasing transparency in Industry, Government sector, and corporate sector.

Outcomes of the Programme: The outcomes of the GST has led to significant improvements in supply chain management by simplifying tax structures, reducing operational costs, enhancing transportation efficiency, improving credit mechanisms, increasing transparency, while also presenting initial challenges that have been largely overcome over time. After completion of training the students understands about,

- Simplification of Tax Structure
- Reduction in Operational Costs
- Enhanced Efficiency in Transportation
- Improved Input Tax Credit Mechanism
- Challenges During Transition

Respected Sir,

With reference to above mentioned Value Aided Programme on "Machine Learning" held on 17-23 August 2022 with 12 Students in Mechanical Engineering Department. After completion of training all students get certificated.

Objective of the Programme: Objective of machine learning is to enable computers to learn from data and improve their performance on specific tasks over time without being explicitly programmed for each task. The main objective of machine learning to connect the students with machine on the basis of learning from Data, improvement over time, Automation of Decision-Making, Generalization, Versatility across domains and Enhancing human capabilities.

Outcomes of the Programme: The outcomes of machine learning are diverse and impactful across multiple domains including business operations, healthcare diagnostics, customer service enhancements, financial fraud detection, personalized marketing strategies, predictive analytics capabilities, natural language processing advancements, and continuous system improvement. After completion of training, the students to judge as

- Improved Decision-Making
- Automation of Processes
- Enhanced Personalization
- Predictive Analytics
- Improved Accuracy in Diagnostics
- Natural Language Processing (NLP)
- Continuous Improvement

Objective of the Programme: Objective of EAGLE PCB design is to provide a comprehensive and user-friendly platform for creating printed circuit boards (PCBs) through an integrated environment that combines schematic capture, PCB layout, and computer-aided manufacturing (CAM) features. This enables designers to efficiently develop electronic circuits from initial concept to final production-ready designs.

Outcomes of the Programme: After successful outcomes from using Eagle PCB Design include thorough validation through ERC and DRC checks, enhanced quality through adherence to best practices in layout and component placement, generation of essential manufacturing files like Gerber files and BOMs, collaborative opportunities through file sharing capabilities, and access to extensive learning resources within its community.
